## Education

**B.Tech, Computer Science and Engineering**, Narayana Engineering College, Nellore | 2023 -2027 | CGPA: 9.4

**Intermediate**, Narayana Junior College Nellore | 2021-2023 | Percentage: 98.6

**SSC**, Narayana E-Techno School Nellore | 2021 | GPA: 9.8

## Skills

**Languages** — Java | JavaScript | Python | C

**Web Development** — HTML | CSS | React.js | Node.js | Express.js | REST APIs

**Databases** — MySQL | MongoDB

**Core Computer Science** — OOP | DBMS | Data Structures & Algorithms

**AI** — Generative AI | Fundamentals of AI Agents | Prompt Engineering | RAG Fundamentals

**Tools** — Git | GitHub | Postman

## Experience

### Backend Developer Intern | UptoSkills

04/2026 – 07/2026

- Streamlined system performance and improved reliability by deploying new modules, resolving bugs, and strengthening security.
- Collaborated within an Agile team using Git/GitHub, achieving a perfect 10/10 performance rating.

### Competitive Programming Lead | GDG On-Campus NECN

09/2025 – 04/2026

Led campus technical initiatives, organized BUILD-A-THON, a 24-hour national hackathon, and directed Google Cloud Study Jams, achieving a Top 3 National Ranking with 152 certified completions.

### Open Source Contributor | GirlScript Summer of Code

Contributed to open-source projects using Git/GitHub in a distributed development environment.

## Projects

### SprintMind AI — AI-Powered Sprint Planner | Python, Flask, HTML, CSS, JavaScript, Gemini 3.5 Flash

- Engineered an AI sprint planner using Gemini API to automatically decompose complex project requirements into structured multi-week execution roadmaps.
- Designed a workload feasibility engine to analyze task estimations against capacity, identifying bottlenecks and preventing workstream burnout.

### Multi-Source Sentiment Analysis System | Flask, React.js, ML, NLP, APIs

- Designed a responsive analytical interface using React.js, seamlessly connecting it to a robust Flask REST API backend.
- Integrated six machine learning and NLP models (including VADER, TextBlob, and Random Forest) to accurately classify text data.

### SakhiBazaar — AI-Powered E-Commerce Platform for Women-Owned Businesses | MERN Stack, Gemini AI

- Architected a multi-role web platform with tailored workflows for Customers, Sellers, and Admins, incorporating secure role-based access control.
- Integrated GenAI workflows using Gemini API for automated content generation, alongside custom algorithms for targeted product recommendations.
- Built real-time messaging & operational modules using Socket.IO to streamline inventory tracking, order management, and multi-user communications.

## Certifications

**IBM RAG and Agentic AI Professional Certificate** — IBM | Coursera

**Oracle Agentic AI Foundations Associate** — Oracle

**Tata GenAI Powered Data Analytics Simulation**

**Python Essentials** | Cisco Networking Academy

**Postman API Fundamentals Student Expert** — Postman

## Achievements

**First Prize** — Code Relay Competition

**Finalist** — GDG On-Campus DevXplore Hackathon

**Participant** — AI Agents - Intensive Vibe Coding

**Reliance Foundation Undergraduate Scholar**
